Rosenberger: Qualified QLF® Manufacturer for QN Connectors

From now on, Rosenberger is authorized to act as a QLF® manufacturer for QN connectors. QN connectors from Rosenberger have been recently QLF®-qualified (Quick Lock Formula®, a registered trademark). The QLF® standard guarantees full intermateability between connectors produced by the licensing agreement parties.

For QN as well as QMA RF coaxial connectors, Rosenberger has signed licensing agreements with the licensors Huber + Suhner AG, Switzerland, and Radiall S.A., France. Rosenberger is a member of the QLF® alliance and free to market the licensed products.

QN connectors are based on the N connectors' interface, the frequency range is up to 11 GHz. The quick lock coupling mechanism allows fast, easy and reliable connections in the tightest spaces. Rosenberger's current product spectrum covers straight and right angle plugs as well as panel jacks for various cables (UT 141, RG 58, RG 213, RG 214, RG 223). The product range is completed by N (female) – QN (male) adaptors.

QN and standard N connectors are not intermateable.

About Rosenberger

Rosenberger Hochfrequenztechnik GmbH & Co. KG was founded in 1958.

Rosenberger, a family owned company managed by Hans Rosenberger senior and the three sons Hans, Peter and Bernhard, ranks today among the world-wide leading manufacturers of high-frequency coaxial connectors. The product range includes RF-coaxial connectors in all common world-wide standards, automotive connectors and precision connectors for test & measurement applications. In the recently established Wireless Terminal Components business unit Rosenberger offers spring loaded pins, adaptors and Micro-RF test switches for wireless applications, mainly in consumer electronics or mobile phone terminal applications.

In addition, a comprehensive line of accessories, e.g. adaptors, attenuators, calibration kits, as well as cable assemblies is also available.

The headquarters of Rosenberger are located in Fridolfing/Pietling (Oberbayern, Germany) where today approx. 700 people are employed. Worldwide, the company operates 12 manufacturing and assembly locations as well as 17 Rosenberger sales offices in Europe, Asia and North and South America where – in total – more than 2,200 employees develop, produce and sell our products. Rosenberger is certified to ISO/TS 16949: 2002, ISO 9001 and ISO 14001.
